250A DC drive specifications

Supply voltage 400vac 3 phase $\pm 10\%$
Supply current 0-200A 3 phase
Output current 0-250A AMPERE DC

Control:

Control 0-10vdc, 0-5vdc, 4-20mA
control output voltage and output current
start stop input

Protection:

Protection ultra rapid flush mount fuses
fast over current trip with indicator
Over heat protection 85C

Features:

modular design easy to repair on site
feedback no voltage feedback
feedback AC current via CT's
forced air cooling
use of common available spares
master slave operation master has voltage feedback, each slave has indemandant current control

Monitor:

fuse trip
over temp trip
over current trip
drive running

Physical size:

top to bottom: 340mm
left to right: 330mm
depth: 280mm
weight: 20kg
